Professional Summary

Software Engineer with a UX/UI design background and production experience building customer-facing and internal web applications with Next.js, React, TypeScript, Tailwind CSS, AWS Cognito, and Figma. Experienced in online booking flows, authentication, payment integrations, analytics, observability, automated testing, feature flags, and PostgreSQL-driven reporting interfaces. Strong ability to translate product requirements and design systems into responsive, accessible, production-ready web experiences.

Work Experience

Software Engineer *Shack Shine* | July 2025 – May 2026

Frontend-focused engineer owning high-impact customer-facing and internal web applications across online booking, returning customer flows, customer portals, payment experiences, service recommendations, and operational reporting. Led frontend implementation, architecture, observability, testing, authentication, and feature-flagged delivery across multiple production initiatives.

- **Modernized Shack Shine's primary Online Booking Engine** by leading a frontend rebuild from legacy PHP to a scalable **Next.js, TypeScript, and Tailwind CSS** application integrated with **Salesforce** workflows.
- **Engineered secure payment experiences** by implementing **Moneris** and **TSYS iframe integrations** through frontend flows and **Next.js API routes**, supporting compliant Canadian and U.S. customer transactions within a unified platform.
- **Operationalized production observability** with **New Relic, Pino Logger, and AWS CloudWatch**, instrumenting booking funnel metrics, client-side errors, payment flows, and server-side diagnostics to **improve debugging and incident response**.
- **Strengthened release confidence** by building **Vitest unit tests** and **Playwright E2E coverage** across mobile and cross-browser flows, paired with **Unleash feature flags** for safer releases.
- **Architected authenticated customer portal experiences** using **AWS Cognito**, including sign-up, login, forgot password, dashboards, appointment details, and a magic-link returning customer flow for faster rebooking.
- **Developed frontend ShineOS operation portal** with role-based access via **AWS Cognito groups**, connecting frontend reporting views to **PostgreSQL-backed data workflows** and validation logic for accurate operational reporting.
- **Leveraged Claude, Cursor, and agentic AI workflows** to accelerate legacy code analysis, frontend implementation, debugging, refactoring, and delivery planning.
- **Enabled marketing attribution and conversion analysis** by implementing and validating **Google Tag Manager** custom data layer events across booking steps and key customer interactions.

Selected Work: [Online Booking Engine](#)

Teaching Assistant – Full Stack Web Development Bootcamp *Henry* | April 2025 – July 2025

- Supported students learning HTML, CSS, JavaScript, React, Node.js, Express, databases, Git, and full-stack application development.

- Reviewed code, debugged student projects, and explained technical concepts in an accessible, practical way.
- Guided students through frontend structure, API integration, component logic, database concepts, and development best practices.
- Encouraged collaboration, communication, problem-solving, and confidence in technical interviews and project work.

UX/UI & Development Intern *Canadian Hispanic-Latin American Virtual Museum* | March 2024 – May 2024

- Evaluated usability, responsiveness, and accessibility of virtual exhibits across platforms.
- Created 3D models in Blender and integrated them into interactive environments using GDScript and Godot.
- Built a proof-of-concept virtual video game prototype aligned with WCAG and UX standards.
- Designed visual assets for YouTube to support cohesive digital presence.

Pastry Cook *Dessert Lady* | May 2018 – Jan 2025

- Maintained high standards of presentation, cleanliness, and customer service.
- Managed custom orders and ensured consistent production for high-volume kitchen needs.
- Gained valuable soft skills: time management, precision, communication, and attention to detail.

Projects

SmartQR – Self-Ordering Web App

<https://www.smart-qr.tech> | May 2025 – June 2025

Frontend Developer & UI/UX Designer

- Built a mobile-first QR ordering platform that allows customers to browse menus, place orders, and complete payment flows.
- Designed user flows, interfaces, and brand identity in Figma and FigJam.
- Implemented Auth0 authentication, dynamic QR code generation, and session state management using React Context and localStorage.
- Selected as one of Henry's top 4 projects of the month and showcased at Demo Day.

Tech Mobile – E-commerce Frontend

<https://tech-mobile-mocha.vercel.app> | April 2025 – May 2025

Frontend Developer & UI/UX Designer

- Built a responsive e-commerce frontend with Next.js 14, App Router, TypeScript, and Tailwind CSS.
- Integrated REST APIs, protected routes with middleware, and validated forms with Zod.
- Added interactive UI elements using Framer Motion and Lucide icons.

Lotus Spa – Full-Stack Booking Platform

<https://lotus-spa-seven.vercel.app> | March 2025

Full Stack Developer

- Developed a booking platform with user authentication, appointment scheduling, and PostgreSQL-backed data.
- Built form workflows using Formik and Yup.

- Implemented controlled booking logic to limit appointments to weekdays and improve scheduling accuracy.
-

Education

Full Stack Development Certificate

Henry — Jan 2025 – Jun 2025

- SmartQR project selected as one of the top 4 of the month to be showcased at Henry's Demo Day (live-streamed for companies and the wider community)

Diploma in Multimedia Design and Development

Humber College (ON, Canada) — Jan 2023 – Jul 2024

- Graduated with Honours
- Dean's List

Advanced Diploma in Technical & Scientific Translation

Instituto Superior Dardo Rocha (Argentina) — Mar 2012 – Dec 2017

Technical Skills

Frontend: Next.js, React, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, Framer Motion, Responsive Design

UX/UI: Figma, FigJam, User Flows, Wireframing, Prototyping, Accessibility, WCAG

Backend & APIs: Next.js API Routes, Node.js, Express.js, REST APIs, PostgreSQL, SQL, MongoDB, TypeORM

Authentication: AWS Cognito, AWS Amplify, Auth0, JWT, Role-Based Access

Testing: Vitest, Playwright, Unit Testing, E2E Testing

Cloud & production tools: CloudWatch, ECS Task Definitions, Secrets Manager, Aurora RDS, API Gateway, S3, Docker, GitHub Actions, Vercel

Observability & Analytics: New Relic, Pino Logger, Google Tag Manager

Integrations & Tools: Salesforce, Moneris, TSYS, Strapi, Unleash, All Quiet, Git, GitHub, Jira, Notion, pgAdmin, Cursor, Claude

Practices: Agile/Scrum, CI/CD, Feature Flags, Cross-Browser Compatibility, API Integration, Production Support
